CAREER OBJECTIVE

Language agnostic Software Engineer, focused on creating cost effective solutions, with 12+ years of experience in the IT field and 5+ years of experience with remote work, leading international teams, and passionate about technology. Being able to be self-taught and independent, Teamwork is Key, The Language is just the way to accomplish the end goal of having stable, robust, scalable, and strong software.

EXPERIENCE

SENIOR SOFTWARE DEVELOPER

Adaptivetelehealth, Moresville, NC / Jan 2017 - Present

- HIPAA compliant software development for an industry-leading cloud-native platform with 100+ different features focused on providing an all-in-one turn key solution for psychologists, psychiatrists, and physicians as a platform with all the tools needed to perform their practice. Worked on different roles within the company covering the whole development life cycle, architecture, design, full-stack development, API integrations, database management, migrations, DevOps, testing, team leading, documentation and knowledge and requirements gathering expertise with a focus on human interaction and meeting the goal of being the go-to person to ask any question about the project.

SUPPORT ENGINEER

Techaid Solutions, Jacksonville, FL / Jan 2016 - Jan 2017

- Member of a support team, whose main task was focused on diagnosing and troubleshooting software problems to TechAID's client Auth0. Also performed as a tester of all their different SDK's for different languages and platforms. Auth0 provides a standard authentication protocol and single sign-on authentication for many different platforms. This job required the ability to learn any language fast and be able to set up their demo tutorials in any language and debug the source code of all the tutorials looking for errors.

SOFTWARE DEVELOPMENT TEAM LEAD

Telefonica Movistar Venezuela, Caracas, DC / Mar 2015 - Jan 2016

- Worked as a Software team lead in charge of an internal application used to commercialize, provisioning, and installation of the corporate

internet as well as the main centralized database of all the antennas that the company has installed throughout the whole country. The team lead by me had 5 members and worked as a software factory inside the company. Roles performed cover Full Stack Developer, Oracle Database Administration, requirement gathering, and support.

SOFTWARE DEVELOPMENT COORDINATOR

Ittaca Corp, Caracas, DC / Aug 2014 - Mar 2015

- Worked as a team lead of a team in charge of developing different products for Ittaca's client Telefonica Movistar Venezuela. Main responsibilities included Software Architecture Design, Team Lead, Full Software Web Development, Database Design, and Support.
- Supervised and trained team members on daily operations.
- Motivated and inspired employees to achieve high performance while adhering to Company procedures.
- Demonstrated positive leadership skill through effective communication and personnel selection, development and motivation.

SOFTWARE DEVELOPER

Ittaca Corp, Caracas, DC / Sep 2011 - Aug 2014

- Worked as a Software developer for different internal platforms for Ittaca's client Telefonica Movistar Venezuela. Main Responsibilities included Software Development, Database Design, and implementation, and Support.
- Provided website and web application maintenance and enhancements.
- Developed, documented and maintained production code.
- Ensured best possible performance, quality and responsiveness of applications.

SYSTEM ANALYST

Animaciones iConos C.A., Caracas, DC / Sep 2009 - Aug 2011

- Participated in design, development, testing and implementation activities.
- Analyzed and troubleshooted complex software problems and provided solutions using latest technologies.
- Created web applications and components from requirements stage, through design, through production deployment.
- Built user interface applications and back-end databases using various programming and scripting languages.
- Developed Web Applications for Icono's Client Telefonica Movistar.
